Zomer Gregorio

Santa Maria, Bulacan | zomergregorio@gmail.com | +63 949 684 9273 | zoms.vercel.app | github.com/zomeru

EXPERIENCE

Software Developer | *Seansoft Corporation* Makati, Philippines | **Jan 2024 – Apr 2026**

- Contributed to a complex mineral management platform, collaborating closely with other engineers.
- Migrated a large legacy AngularJS codebase to React, improving maintainability and performance.
- Optimized the Leaflet map performance by removing unused markers and layers, boosting UI responsiveness.
- Built reusable and responsive React + Bootstrap UI components, improving consistency across the product.
- Created and improved Django API endpoints, with strong validation and reliable data handling.
- Improved audit logging by migrating a custom system to database-level audit logs.
- Implemented Cypress E2E and unit tests to prevent regression in key features.
- Improved security by updating dependencies and fixing vulnerabilities.
- Used AI (Claude Code, Copilot) to orchestrate AngularJS-to-React migration, creating PRDs, implementation tasks, and tests.

Part-time React Developer | *Binbooker* Vancouver Canada (Remote) | **Mar 2025 – July 2025**

- Improved various parts of the BinBooker app using React and SCSS for a smoother, easier user experience.
- Implemented advanced filtering and reporting features, enabling users to analyze operational data more efficiently.
- Optimized the Bins Management page, significantly improving performance when rendering large datasets.
- Enhanced Stripe integration reliability and added a system-wide maintenance mode to support safer deployments.

Full Stack Developer | *Evelan GmbH* Hamburg, Germany (Remote) | **Aug 2023 – Jan 2024**

- Contributed to PAUL 360, a secure document collaboration platform.
- Built response and reusable UI components using React and Chakra UI.
- Developed type-safe APIs using Next.js and tRPC for efficient end-to-end data flow.
- Create unit tests using Jest to improve core logic reliability.
- Designed and optimized scalable PostgreSQL schemas with Prisma.
- Implemented shared validation with Zod across client and server to ensure data integrity.
- Participated in PR reviews to maintain consistent architecture and code quality

Software Engineer | *Beyonder Inc.* Makati Philippines | **Feb 2022 – July 2023**

- Built full-stack web/mobile apps with React, React Native, and Express.
- Implemented CI/CD pipelines using GitHub Actions, reducing manual deployment steps.
- Translated requirements into Figma prototypes for design alignment.
- Delivered multiple client-facing products (Kokuban (MVP), スマホ de マップ, Doko?).
- Led frontend initiatives, mentoring junior developers and promoting consistent development standards across projects.

EDUCATION

Bachelor of Science in Information Technology | *STI College Alabang* Dean's Lister Awardee | **2019 – 2023**

SKILLS

- **Languages**: JavaScript, TypeScript, Python, SQL, PostgreSQL
- **Technologies**: React, Next.js, React Native, Node.js, Express, Tailwind CSS, Prisma, MongoDB, Turborepo
- **Tools**: VS Code, Git, GitHub, GitHub Actions, Vercel, Firebase, Claude Code, Codex, OpenCode, Copilot

PERSONAL PROJECTS

- **PlayLater** - Offline-first mobile hub to save YouTube, Netflix, and other streaming content with one-tap playback.
- **Rezumer** - AI-assisted resume builder that lets users draft, refine, and tailor resumes, with AI-powered optimization, job-description matching, and a context-aware assistant.
- **Zomink** - Link management platform to create, track, and shorten URLs with custom aliases.
