EXPERIENCE

Full Stack Developer at Evelan GmbH | Hamburg, Germany (Remote)   **Aug 2023 - Jan 2024**

- Joined an existing project aimed at developing and enhancing all-in-one management system, a comprehensive master data, company holdings, tasks, and document management system for corporate and holding structures.
- Collaborate with designers, project managers, and other engineers to deliver high quality products for clients.
- Review pull requests of other developers.
- Updated onboarding documents and setting up the local environment.

Software Engineer at Beyonder Inc. | Makati City, Philippines   **Feb 2022 - Jul 2023**

- Write modern, performant, and robust code for a diverse array of client and internal projects.
- Create prototypes using Figma to visualize design concepts and guide the development process.
- Successfully delivered multiple web and mobile applications, including Kokuban, スマホdeマップ, and Doko?
- Work remotely and collaborate with teams of engineers to ensure project success.
- Lead the front-end development team and mentor some junior developers and interns.

Full Stack Developer at Freelance | Muntinlupa City, Philippines   **Apr 2021 - Feb 2022**

- Collaborated with a team of three developers to deliver web applications for small startups and individuals.
- Translated PSD designs into high-quality web pages, ensuring a seamless user experience.
- Created prototypes using Figma to guide the development process.

EDUCATION

Bachelor of Science in Information Technology, *STI College*   **July 2019 - July 2023**

PROJECTS

Batibot | Full Stack Developer | GitHub URL

An AI-powered messaging companion app for iOS and Android, built with React Native CLI.

- Can generate formatted programming code that can be copied.
- Implemented authentication and oAuth using Supabase.
- Implemented an algorithm to make GPT 3.5 respond based on conversation history.
- Made a chatbot for telegram and facebook messenger that uses the same GPTimplementation and both can generate images.

Zomink | Full Stack Developer | GitHub URL | Live URL

An open-source link shortener.

- Developed and designed the whole web application.

STICA LMS | Full Stack Developer | GitHub URL | Live URL

An online library management system for STI College Alabang (My capstone project).

- Led the development of the entire web application, including the admin panel.
- Created prototypes using Figma to guide the development process.

Paymongo.js | Full Stack Developer | GitHub URL | Live URL

A lightweight, fully featured, modular, TypeScript-compatible JavaScript library for PayMongo.

- Integrated built-in types from input to response for rich TypeScript support.

Groundwork PH | Full Stack Developer | Live URL

An online B2B platform designed to create and gather networks for business establishments.

- Implemented messaging feature using Firebase and the payment flow using PayMongo.
- Worked with 2 experienced developers to design and develop the web app.
